

KARTIK TIWARI

Data & AI Solutions Developer | Python, ML Integration & Data Visualization
Ghaziabad, Uttar Pradesh, India • kartiktiwari8790@gmail.com • LinkedIn • GitHub • Portfolio

PROFILE

Final-year Computer Applications student who builds complete, working data and AI products rather than isolated exercises — from cleaning and visualizing raw datasets to deploying full-stack applications with integrated machine learning models. Certified Data Analyst (Python, SQL) with a track record of independently designing, building, and shipping production-grade projects end to end.

SKILLS

Data & Analytics: Python, SQL, Pandas, NumPy, Power BI, Exploratory Data Analysis, Data Cleaning, Data Visualization (Plotly)

AI / ML: Scikit-learn, Machine Learning Model Integration, Agentic AI, Prompt Engineering, LLM APIs

Engineering: FastAPI, REST APIs, MySQL, JavaScript (ES6+), Git/GitHub, CI/CD, Responsive Web Design

EXPERIENCE

Python Development Intern | QSkill Media / SR INDIA • Remote

Apr – May 2026

- Built and shipped 3 end-to-end Python data & ML applications for the internship's project track: an EDA pipeline (Pandas, Matplotlib/Seaborn) analyzing a 200-record employee dataset through department salary comparisons, experience-vs-salary trends, and correlation heatmaps.
- Trained and evaluated a scikit-learn Linear Regression model on a real housing dataset to predict prices from 15+ features, validating results with RMSE/R² metrics and visual diagnostics (residual plots, feature-importance ranking).
- Engineered a Matrix Operations desktop tool in Python (NumPy + Tkinter) with a custom dark-themed GUI supporting addition, subtraction, multiplication, transpose, determinant, and inverse operations, including live shape validation and error handling.
- Earned a formal Letter of Recommendation from the Co-Founder for productivity and rapid adoption of new technologies.

Head of Management | GDG on Campus, HRIT (Google Developer Group)

Aug 2025 – Jan 2026

- Led operations for a 100+ member developer community for 6 months — owned event planning, workshop logistics, and cross-team coordination.
- Organized hackathons and technical workshops that measurably grew member engagement and skill-building on campus.

KEY PROJECTS

Automated Data Visualization Dashboard

kartiktiwaridev7.github.io/Dashboard

- Built a client-side EDA tool that automatically parses uploaded JSON datasets and renders them as interactive, multi-format charts — turning raw data into actionable visual insight with no backend.
- Designed one-click chart export and dynamic UI state handling for a smooth, self-serve data-exploration workflow.

CardioCore — Full-Stack ML Diagnostic Platform

cardio-core.netlify.app

- Architected and deployed a decoupled application integrating a trained ML model (13-feature clinical dataset, scikit-learn) with a FastAPI backend and managed MySQL database.
- Configured an automated CI/CD pipeline (GitHub → Render/Netlify), independently resolving CORS and production environment-variable issues.

LinkedIn Profile Coach — Autonomous AI Agent

agent.ai/agent/srq2a11gg9302cm1

- Designed and deployed an autonomous agent using agentic design patterns (goal decomposition, multi-step reasoning) to generate personalized content strategy from LinkedIn profile data.

EDUCATION

Bachelor of Computer Applications (BCA) — HRIT Group of Institutions, Ghaziabad (CCSU University)

Semester VI • Final exams May 2026

CERTIFICATIONS & TRAINING

- Certified Data Analyst — Brain Mentors (Jan–Jun 2025)
- Python Development Internship Certificate — QSkill / SR INDIA (May 2026)
- Agentic AI Starter Course — Saumya Singh (2025)
- Climate Change and AI — Ecology Circle Dialogue, TERI School of Advanced Studies (Feb 2026)
- Cyber Security Seminar — HRIT (2024)
